

Elite Series

see through touch system

Innovative. Disruptive. And drop dead gorgeous. Our mobile see through touch display technology takes DJing and digital performance to entirely new territories.

*"Minority Report
for real"*

Elite Series is a fully transportable see through multi touch display. A technical brilliance ideal for performing artists, mobile DJs, corporate events and more. Equipped with a 42"-46" transparent screen fitted with either InfraRed or our new ProCAP film. Built with a super strong case boasting 60lb force struts that lift the glass into position for a spectacular reveal. Fully pre-programmed PC option available!

elite
PRO-LITE-IR

Provide clients with an unforgettable experience. Floating content that transports information directly to your fingertips. Super-fast response time of 5ms. Easily maneuver and setup in under 60 seconds.

The Elite series hardware is always fitted with the latest & most reliable touch technology. It is extremely easy and safe to transport in its specially designed road case. All you have to do when you arrive to your location is open the case, lock the arms into position and plug it in. The show can start!
